Module III presents a comprehensive review of leadership techniques for managers and aspiring managers to utilize in their individual business, and governmental, educational, and nonprofit organizations. This Module will focus on organizational behavior, the decision-making process and community interaction and leadership. Additionally, attention will be given to the nature and types of businesses, as well governmental, educational, and nonprofit organizations. Finally, project management techniques critical tools in meeting the successful completion of projects in these financially challenging times in our communities will also be discussed. Materials covered in this final Module of the APWA Leadership Institute will prepare the participant to develop leadership skills required in a Public Works setting.
