The West Coast Branch of the American Public Works Association is pleased to offer a unique opportunity to fifty public works professionals.

Royal Concrete Concepts has offered to host a behind the scenes tour of their hurricane proof fabrication facility in Okeechobee, Florida. RCC is known for building schools, churches, apartments and even single family homes that can withstand Category 5 hurricanes. These hardened, pre-cast, tilt wall structures are the future of construction industry but available today.

**Date:** Thursday, March 31st, 2011  
**Cost:** $30.00  
(must accompany your registration to confirm a seat)  
Includes transportation, snack, tour of RCC facility and lunch.

**Who should attend?** Architects, engineers, public works directors, consultants, and students of any of these disciplines
