The 2011 scholarship program was a great success, with the Chapter being able to provide support to 10 individuals. This was the first year in implementing five categories: Career Development; Public Works Academy; Public Works Institute; Undergraduate and Graduate programs. These additional categories allowed for individuals to receive scholarships in four of the five categories.

This year the Personal Statement was implemented. This allowed for applicants to provide a better illustration on personal and professional successes, as well as career path goals.

Much thanks is to the Branches that provided funds to allow for the scholarship program to occur. Due to financial constraints within the Scholarship Trust, the Chapter was not able to support the program. We are hopeful the Trust will perform at a level that will allow for support during the 2012 scholarship program.
