TABLEAU OF WEST COAST BRANCH AWARDS

“Project of the Year” Awards
Awards will be given in categories that are aligned with National awards. This award recognizes the managing agency, the consultant/architect/engineer, and the contractor who, working together, complete public works projects.

Awards are divided into five categories that include:

- Structures—to include public structure preservation/rehabilitation, municipal buildings, parks, etc.
- Transportation—to include roads, bridges, mass transit, etc.
- Environment—to include treatment and recycling facilities, landfill reclamation projects, sewer projects, etc.
- Historical Restoration/Preservation—to include historical restoration, preservation and adaptive reuse of existing buildings and structures and facilities, etc.
- Disaster or Emergency Construction/Repair—to include the techniques and timing for safety, community relations, environmental protection, adverse conditions and additional considerations.

Public works is defined as the physical structures and facilities that are developed, owned, and maintained by public agencies to house governmental functions and provide water, power, waste disposal, transportation, and similar public services in accordance with established public policy. To be eligible for nomination, a project must have been “substantially completed” and available for public and/or agency use within two calendar years prior to nomination. If a project has multiple phases or segments, then “substantially completed” will be construed as that point when the final phase or segment is 90% completed and available for public and/or agency use. Criteria to be used in the selection process include:

Use of good construction management techniques and completion of the project on schedule;

Safety performance and demonstrated awareness of the need for a good overall safety program during construction;

Community relations as evidence by efforts to minimize public inconvenience due to construction, safety precautions to protect public lives and property, provision of observation areas, guided tours, or other means of improving relations between the agency and the public;
Demonstrated awareness for the need to protect the environment during the project. This includes any special considerations given to particular environmental concerns raised during the course of the project;

Unusual accomplishments under adverse conditions including, but not limited to age or condition of the facility, adverse weather, soil or other site conditions over which there is no control; and

Additional conditions deemed of importance to the public works agency such as exceptional efforts to maintain quality control and, if value engineering is used, construction innovations as evidenced by time and/or money-saving techniques developed and/or successfully utilized.

**Young Leader Award**

This award is to recognize and encourage young APWA members who have demonstrated an initial commitment to the profession and the chapter and show potential for future growth within the chapter. The award promotes the concept that length of career of the nominee does not necessarily indicate his/her leadership abilities or potential for service. Candidates must be active members of APWA for five consecutive years and not exceed 35 years of age as of the award deadline.

Please include candidate’s birth date in nomination materials. The candidates must have demonstrated an ability and eagerness to act at the chapter or branch level by serving on committees, as an officer, heading projects, or contributing in general to the well-being of the chapter.

The candidate should have also accomplished one or more of the following:

- contributed in some significant manner to his/her public agency or company by implementing new ideas, overcoming problems, controlling costs, etc.;
- helped to advance the cause of the public works profession either with leadership commitments to significant community projects or as an advocate for public works issues at the legislative level in local, state, or federal governments; and/or
- demonstrated an ongoing commitment to continuing education in the public works field (i.e., related educational degree(s), attendance at workshops, seminars, or CEU credits, etc.).

works in serving the public and protecting the environment. The award is open to anyone actively involved in the public works profession.

The following criteria are used in the selection process:

• Each nominated innovation is judged on its effect upon the provision of goods and services to the public. It can be an innovation in the process itself or in the materials, design, equipment, administration, management training, procurement of, etc., that improves, informs, or educates the delivery of public services and improves the quality of life. A project can be nominated for its innovative concepts or methods.

• The innovation must be a proven success. It must have had a positive and important effect on, improve the quality of, or reduce the cost of the delivery of public works goods and services. Innovation is the implementation of new methods and new technologies. It is not merely an idea that has merit and may be successful in the future.

• The innovation must be a significant advance, not just a natural evolution of existing methods, common sense or good practice.
